

## **Chapter 7**

### **1. Bookstore: Testing the web application**

Use your own bookstore application from the GitHub.

Check StudentListTest example from the moodle

- a. Add Smoke testing to your Bookstore application (for all controllers)
- b. Add JPA repository tests (for all repositories)
  - i. Test create, delete and search functionalities

Push all changes to GitHub

### **2. Bookstore: Bonus - deployment**

Deploy your Bookstore in Heroku
